

Moving America's Energy

Investor Presentation

June 2025

Forward-looking Statements / Legal Disclaimer

Management of Energy Transfer LP (ET) will provide this presentation to analysts and/or investors throughout June 2025. At the meetings, members of management may make statements about future events, outlook and expectations related to Sunoco LP (SUN), USA Compression Partners, LP (USAC), and ET (collectively, the Partnerships), and their subsidiaries and this presentation may contain statements about future events, outlook and expectations related to the Partnerships and their subsidiaries, all of which statements are forward-looking statements. These may also include certain statements about the Partnerships' ability to successfully complete and integrate transactions described herein and the possibility that the anticipated benefits of the transactions cannot be fully realized. Any statement made by a member of management of the Partnerships at these meetings and any statement in this presentation that is not a historical fact will be deemed to be a forward-looking statement. These forward-looking statements of the Partnerships believe to be reasonable, but these statements are subject to a number of risks, uncertainties and other factors, many of which are outside the control of the Partnerships. While the Partnerships believe that the assumptions concerning these future events are reasonable, we caution that there are inherent risks and uncertainties in predicting these future events and their subsidiaries to be materially different. These risks and uncertainties are discussed in more detail in the filings made by the Partnerships with the Securities and Exchange Commission, copies of which are available to the public. In addition to the risks and uncertainties disclosed in our SEC filings the Partnerships expressly disclaim any intention or obligation to revise or publicly update any forward-looking statements, whether as a result of new information, future events, or otherwise.

This presentation includes certain forward looking non-GAAP financial measures as defined under SEC Regulation G, including estimated adjusted EBITDA. Due to the forward-looking nature of the aforementioned non-GAAP financial measures, management cannot reliably or reasonably predict certain of the necessary components of the most directly comparable forward-looking GAAP measures without unreasonable effort. Accordingly, we are unable to present a quantitative reconciliation of such forward-looking non-GAAP financial measures to their most directly comparable forward-looking GAAP financial measures.

All references in this presentation to capacity of a pipeline, processing plant or storage facility relate to maximum capacity under normal operating conditions and with respect to pipeline transportation capacity, is subject to multiple factors (including natural gas injections and withdrawals at various delivery points along the pipeline and the utilization of compression) which may reduce the throughput capacity from specified capacity levels.

What's New?

Q1 2025 Net Income Attributable to the Partners \$1.32 BILLION

Up 7% vs Q1 2024

Operational

- Energy Transfer volumes compared to Q1'24
 - Interstate natural gas transportation up 3%; setting a new partnership record
 - Crude oil transportation up 10% _
 - NGL transportation volumes up 4% _
 - Total NGL exports up 5% _
 - Midstream gathered volumes up more than 2%
 - Commenced construction of Hugh Brinson _ Pipeline, which will provide additional transportation capacity out of the Permian Basin to serve growing natural gas demand

Q1 2025 Adjusted EBITDA

\$4.10 BILLION

Up 6% vs Q1 2024

Financial

- Reiterated 2025 Guidance:
 - Expected Adj. EBITDA: \$16.1 \$16.5B
 - Expected Growth Capital: ~\$5.0B¹
- > Adjusted EBITDA:
 - Q1'25: \$4,10B
- Distributable Cash Flow attributable to partners:
 - Q1'25: \$2.31B
- > Q1'25 Capital Expenditures:
 - Growth: \$954MM¹
 - Maintenance: \$166MM¹
- > Announced increase to guarterly cash distribution to \$0.3275 per unit; up more than 3% vs Q1'24

2025 Adjusted EBITDA Guidance \$16.1-\$16.5

BILLION

Midpoint up 5% vs FY 2024

Strategic

- In February, entered into a long-term agreement with Cloudburst Data Centers, Inc. (CloudBurst) to provide natural gas to CloudBurst's flagship Alfocused data center development in Central Texas²
- To date, Lake Charles has signed HOAs or SPAs \geq for more than 10 MTPA
 - SPA with Chevron U.S.A. for 2.0 MTPA³
 - HOA with MidOcean Energy to fund 30% of construction costs and be entitled to receive 30% of LNG production³
 - HOA with a German energy company for 1.0 MTPA³
 - Binding SPA with Kyushu Electric Power Company, for 1.0 MTPA³
 - Binding SPA with an international energy company for 1.0 MTPA^{3,4}

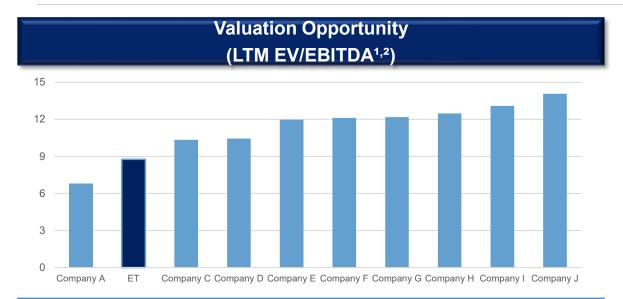

- Energy Transfer excluding SUN and USA Compression capital expenditures
- Subject to CloudBurst reaching a positive final investment decision with its customer
- Subject to Energy Transfer LNG taking a positive final investment decision as well as the satisfaction of other conditions precedent 3. 4.
- Subject to the approval of the board of directors, which is expected to be received during the second quarter of 2025

Why Energy Transfer

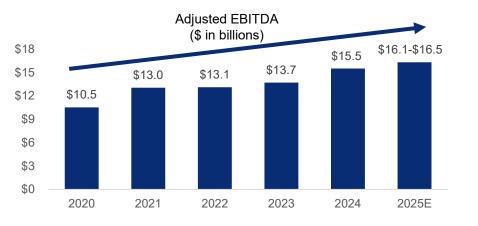

2025E Adjusted EBITDA Breakout

4

Well Positioned For Continued Growth

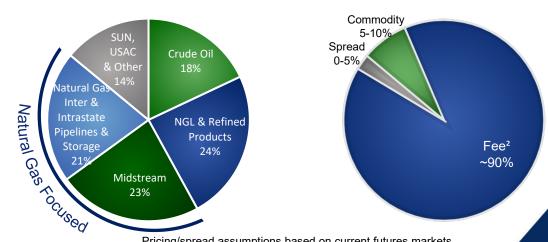

Source: Bloomberg: EV= Current market cap + preferred equity +minority interest + net debt; EBTIDA = TTM Adjusted EBITDA; as of YE 2024

- Peer group includes: ENB, EPD, KMI, MPLX, OKE, PAA, TRGP, TRP, WMB
- З. Based on Energy Transfer's calculation of the Rating Agency leverage ratio

Significantly Improved Financial Position

- Strongest financial position in partnership history
- > Pro forma for a full year of acquisitions, Energy Transfer's leverage ratios are now in the lower half of its 4.0-4.5x target range³
- Managing strong distribution coverage and targeting annual distribution growth rate of 3% to 5%

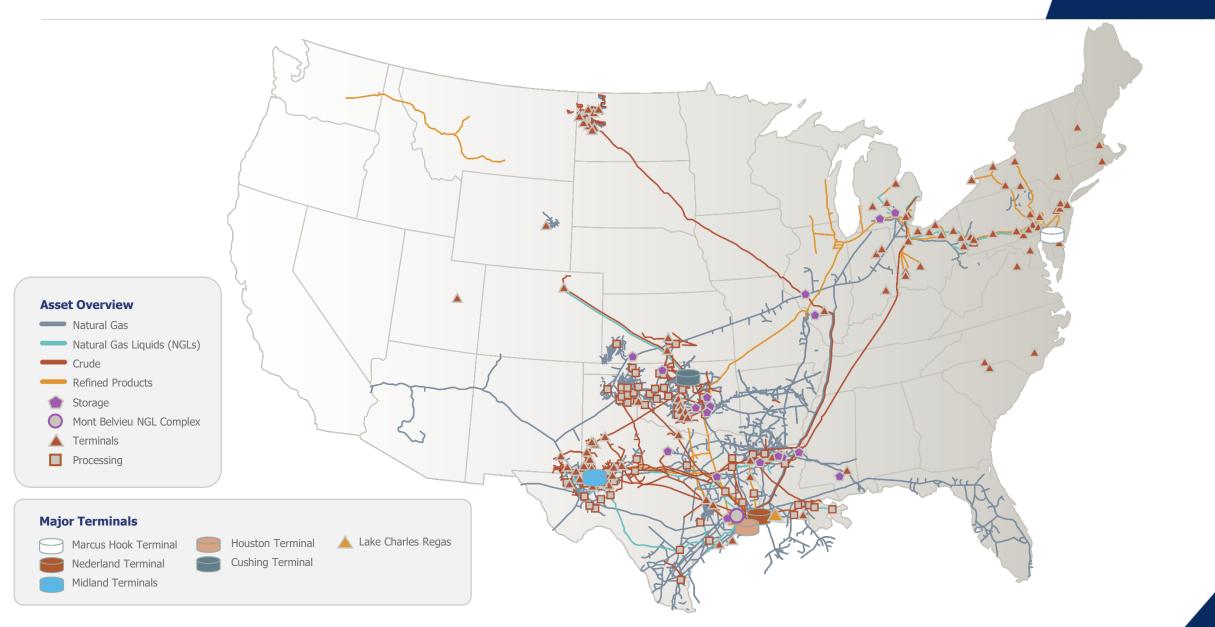

Pricing/spread assumptions based on current futures markets

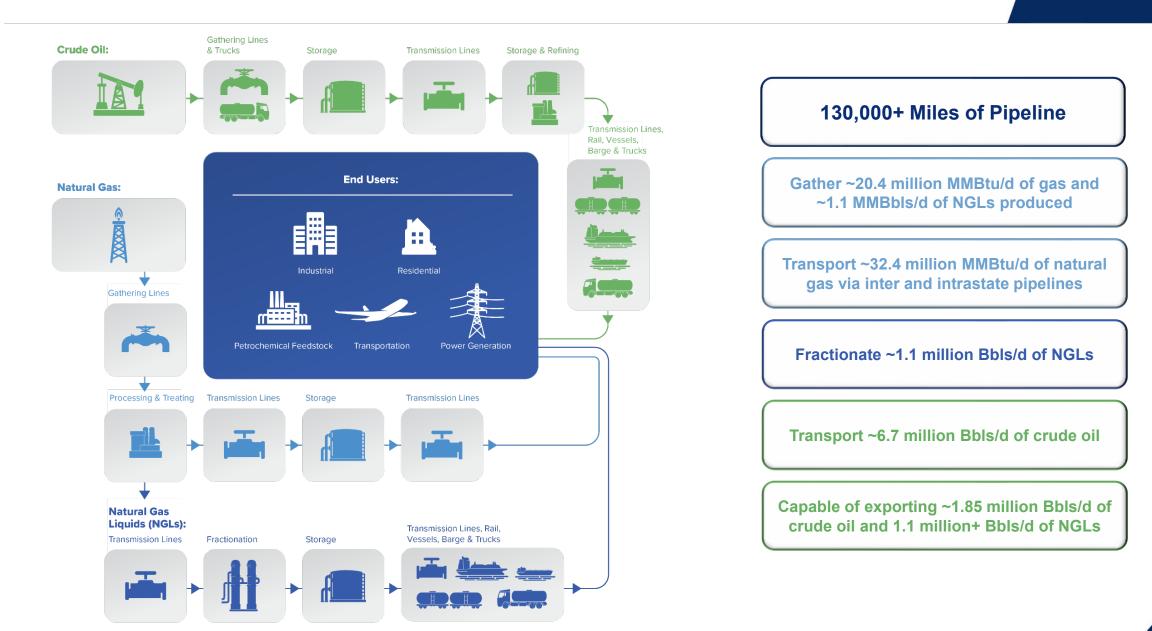

Nationwide Footprint With Diverse Product Offerings Across the Value Chain

Wellhead to Water – Opportunity-Rich Value Chain

Disciplined Growth Targeting Strong Investment Returns & Quick Cash Cycles

	2025E Growth Capital: ~\$5.0 billion ¹	
Midstream	 A significant amount of 2025 spend will be directed toward the Permian Basin, including: Permian Processing Expansions (Badger, Lenorah II² and Mustang Draw) Processing plant capacity additions (Arrowhead I and II) Permian treating upgrades Compression additions Well connects 	% of 2025I ~30%

1. Energy Transfer excluding SUN and USA Compression capital expenditures

2. Formerly known as Red Lake IV

Growth Project Backlog

Project Name	Project Overview	Status
Permian Processing Upgrades	Upgrading four processing plants to add ~200 MMcf/d of incremental processing capacity in West Texas (Includes adding 50 MMcf/d at Grey Wolf, Orla East, Arrowhead II and Arrowhead III, respectively)	In Partial Service
Sabina 2 Pipeline Conversion	Expanding capacity from 25,000 Bbls/d to ~70,000 Bbls/d to provide additional transportation service between Mont Belvieu and Nederland for multiple products (Initial phase increased capacity to ~40,000 Bbls/d)	Initial Phase In Service Remainder by mid-2026
Lenorah II Processing Plant ¹	200 MMcf/d processing plant in the Permian Basin	Q2 2025
Nederland Flexport NGL Expansion	Expansion expected to add up to 250,000 Bbls/d of NGL export capacity at Nederland Terminal; expected to provide flexibility to load various products, based on customer demand	Ethane – May 2025 Propane – July 2025 Ethylene – Q4 2025
Badger Processing Plant	Relocating idle plant to the Delaware Basin to provide an incremental 200 MMcf/d of processing capacity	Mid-2025
Gateway NGL Pipeline Debottlenecking	Project to allow for the full usage of interest in the EPIC Pipeline and optimize deliveries from the Delaware Basin into Gateway Pipeline for deliveries to Mont Belvieu	Mid-2025
Lone Star Express Expansion	Performing upgrades that are expected to provide more than 90,000 Bbls/d of incremental Permian NGL takeaway capacity	2026
Mustang Draw Processing Plant	275 MMcf/d processing plant in the Midland Bason	2Q 2026
Mont Belvieu Frac IX	165,000 Bbls/d fractionator at Mont Belvieu	Q4 2026
Natural Gas-Fired Electric Generation	Constructing 8, 10 MW natural gas-fired electric generation facilities to support Energy Transfer's operations in Texas	1st In Service Remainder 2025-2026
Hugh Brinson Pipeline	Recently commenced construction of a new intrastate pipeline from Waha to ET's extensive pipeline network south of the DFW metroplex	Q4 2026
Marcus Hook Terminal Optimization	Constructing 900,000 Bbls refrigerated ethane storage tank and approximately 20,000 Bbls/d of incremental ethane chilling capacity	Construction Underway
Nederland Refrigerated Storage Expansion	Expansion of refrigerated storage at Nederland; expected to increase butane storage by 33% and propane storage by 100%	Construction Underway
CloudBurst Natural Gas Supply	Long-term agreement with CloudBurst to provide firm natural gas supply to data center in Central Texas	Subject to CloudBurst FID with customer
Sabina 1 Pipeline	Continue to have discussions to provide transportation for potentially multiple products from Mont Belvieu to Houston Ship Channel	Proposed
Blue Marlin	VLCC project from Nederland Terminal; recently approved final FEED study, which keeps the project on pace to meet internal projections	Proposed
Lake Charles LNG Export Terminal	Developing large-scale LNG export facility at existing Lake Charles LNG regasification terminal	Proposed
Carbon Capture and Sequestration	In May 2024, entered into agreement with CapturePoint that commits CO2 from ET treating facilities in northern Louisiana to the capture and sequestration project being jointly developed by ET and CapturePoint	Proposed
Blue Ammonia	Developing ammonia hub concept at Lake Charles, LA and Nederland, TX that would provide infrastructure services to several blue ammonia facilities, including natural gas supply, CO2 transportation to 3 rd party sequestration sites, ammonia storage and deep-water marine loading services	Proposed

Natural Gas Opportunities to Support Growing Power Needs

 Needs: Reliable 24/7 fuel source Speed to market – readily available and efficient to bring online Dedicated supply Strategic location with access to key infrastructure 	 ET Assets: ~105,000 miles of natural gas interstate and intrastate pipelines ~236 Bcf/d of natural gas storage > Expertise in dual-drive gas/electrical compression 				
AI / Data Centers	Potential Earnings From	Power Plants Direct Connects			
Supply Transport \longrightarrow Storage \longrightarrow Data Centers	 Long-term contracts Reservation fees 	<u>3</u>			
 Behind The Meter ➢ Provide gas service to new power generation ➢ ET delivers gas to meter at demand site "Last Mile" Delivery ➢ Capex light ➢ Long-term contracts ➢ Power load management peaker facilities 	≻ Storage fees	 Existing Plants ET Provides additional gas service to current plant expansions 	 New Plants ET connects to new plants constructed to meet growing needs 		

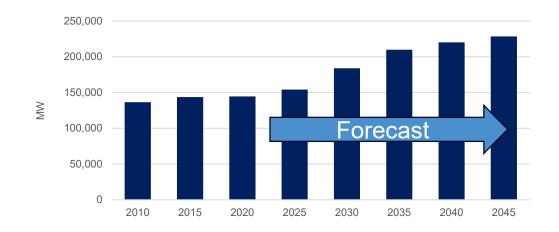

Natural Gas Opportunities to Support Growing Power Needs

PJM Summer Peak Power Demand²

ERCOT Increasing Summer Peaks

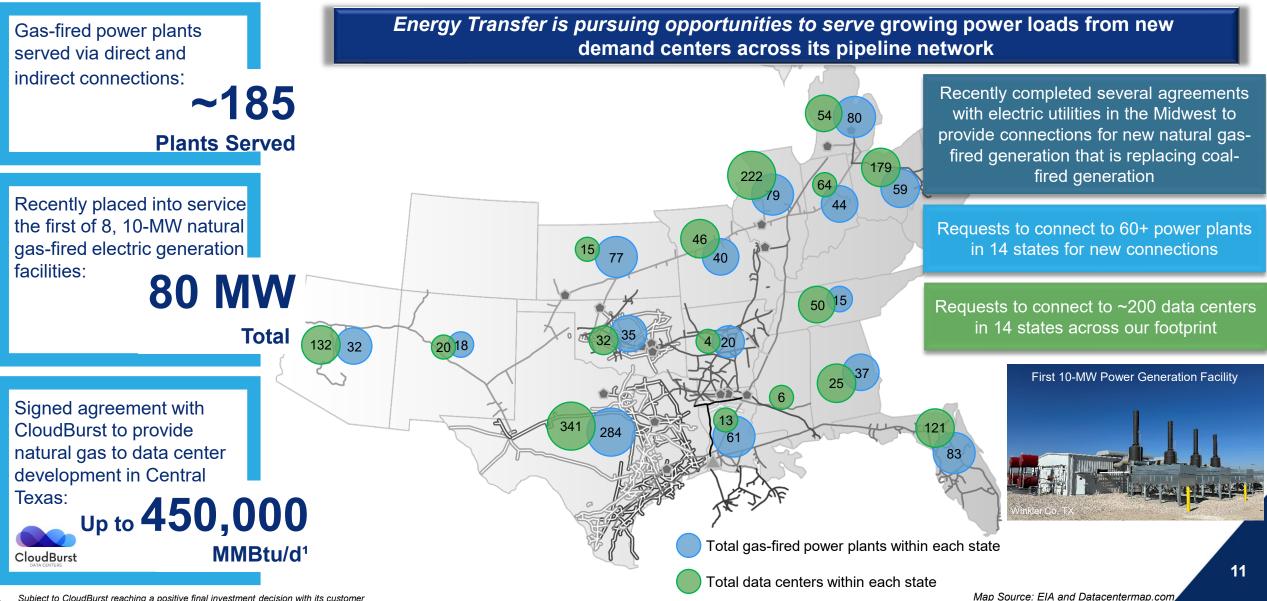

- Datacenter, cryptocurrency mining, industrial oil and gas production facilities growth, as well as strong economic and population growth in Texas is driving steep increases in annual peak load forecasts
- ERCOT forecasts increases of up to 15%/yr over the next few years

PJM Increasing Summer Peaks

- Demand for electricity is growing at the fastest pace in years, primarily from the proliferation of data centers, electrification of buildings and vehicles, and manufacturing
- Over the next 5 years, summer peak power demand increases approximately 19% per PJM's forecast

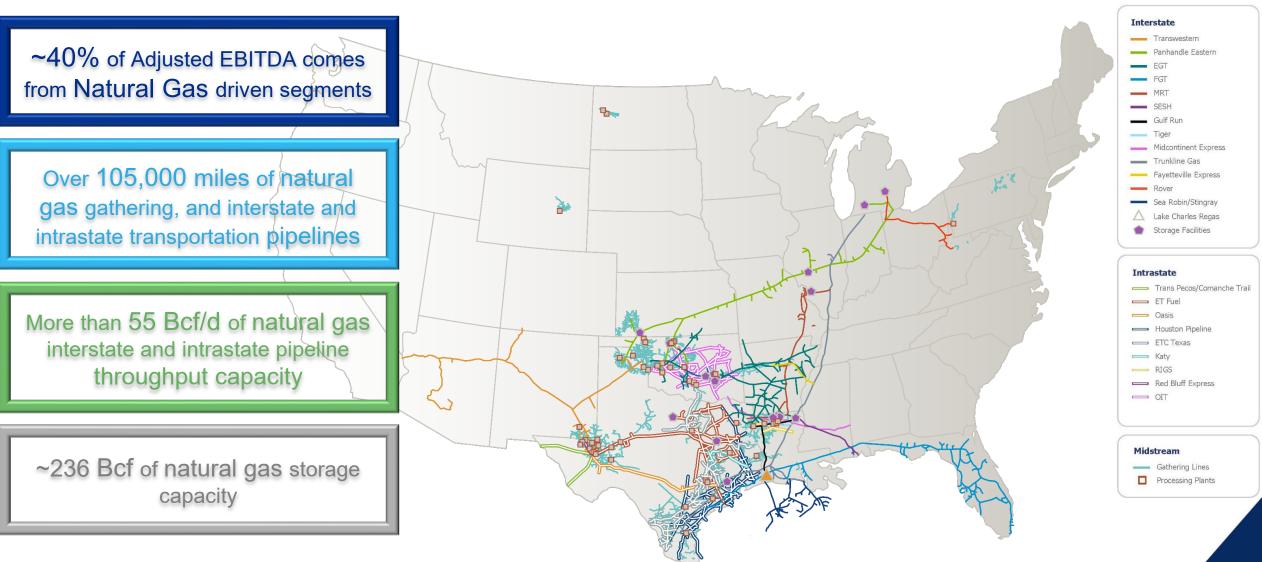

Leading Natural Gas Pipeline Footprint Well Positioned to Meet Growing Electricity Demand

Subject to CloudBurst reaching a positive final investment decision with its custome

Extensive Natural Gas Pipeline Network

ENERGY TRANSFER

Hugh Brinson Pipeline Project Serving Premier Texas Markets and Supporting Data Center and AI Growth

Hugh Brinson Pipeline Project: Phase 1

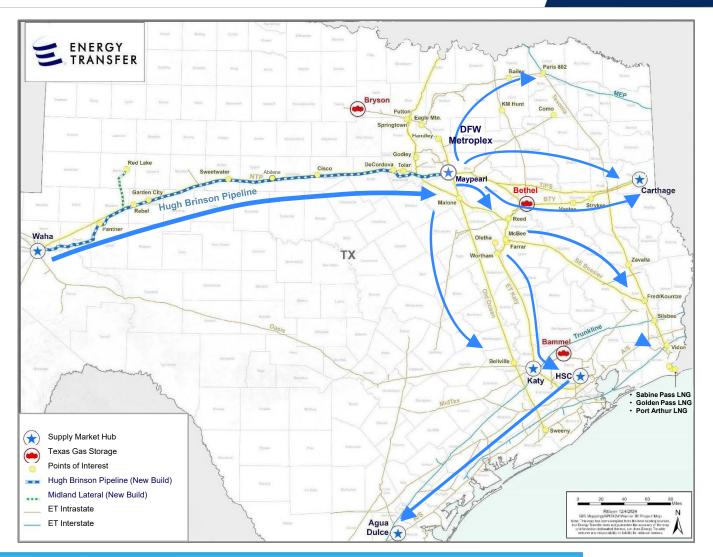

- Construction underway on ~400 miles of 42" pipeline from Waha and the Midland Basin to Maypearl, TX
 - Secured majority of pipeline steel (currently being rolled in U.S. pipe mills)
 - Capacity of 1.5 Bcf/d
 - Phase 1 is completely sold out and backed by long-term, fee-based commitments with strong investment grade counterparties
 - Expected to utilize Energy Transfer's extensive pipeline network south of the DFW metroplex to deliver gas to major trading hubs and markets
 - Expected in service in Q4 2026
- > Also includes construction of Midland Lateral
 - 42-mile, 36-inch lateral to connect ET processing plants in Martin and Midland counties to the Hugh Brinson Pipeline

Hugh Brinson Pipeline Project: Phase 2

- Would increase the capacity to 2.2 Bcf/d with the addition of compression
 - Currently in negotiations that are well in excess of Phase 2 capacity

Combined Project Costs

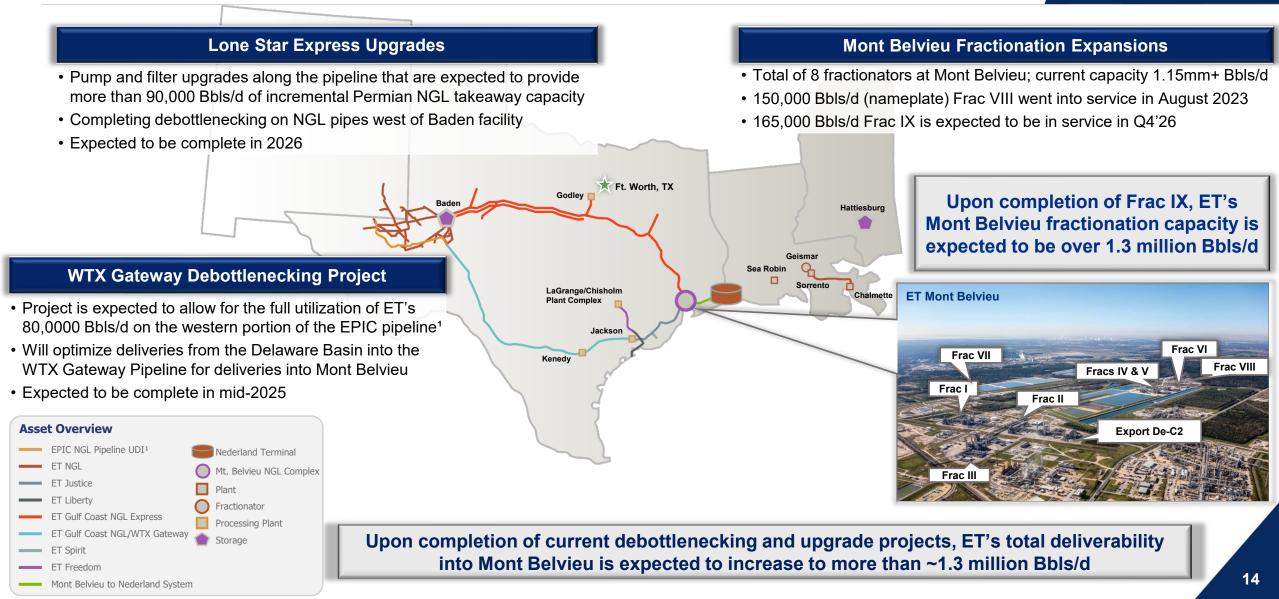

Combined capital of Phase 1 and Phase 2 expected to be ~\$2.7 billion

Further enhances Energy Transfer's flexibility to deliver natural gas to premier Texas markets and trading hubs, and its ability to support power plant and data center growth

NGL Pipeline & Fractionation – Providing Service to Premier Markets

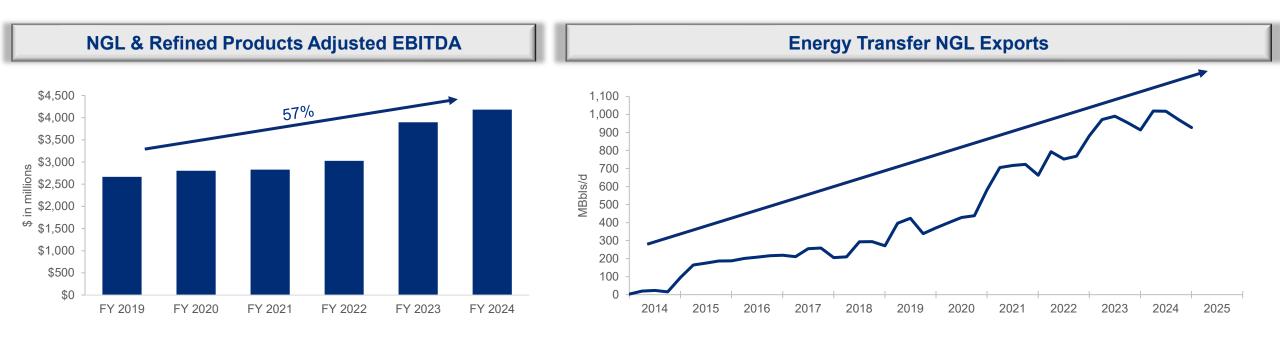

. Energy Transfer owns an undivided interest (UDI) in 80 MBbls/d of capacity in a segment of the EPIC Y-Grade Pipeline, LP (EPIC) pipeline from Orla, TX to Benedum, TX

Strong Growth With Strategic Assets – Well Positioned for Future Opportunities

- Significant capital investments in the past five years
- Competitively advantaged with assets at Mont Belvieu fractionation and storage complex
- Only operator with NGL export terminals located on the Gulf Coast and East Coast (Nederland, Houston and Marcus Hook)
- Export terminals have unique customer offerings with unmatched flexibility and ship loading capabilities
- During 2024, Energy Transfer exported NGLs to more than 55 countries

Expanding World-Class NGL Export Facilities

Marcus Hook Terminal

 Construction underway on 900,000 Bbls refrigerated ethane storage tank and approximately 20,000 Bbls/d of incremental ethane chilling capacity

Total NGL Export Capacity

> 1.1mm Bbls/d

Nederland Terminal

- Construction is nearing completion on an expansion which is expected to add up to 250,000 Bbls/d of NGL export capacity
- Expect to begin ethane service in May 2025, propane service in July 2025, and ethylene export service in Q4 2025
- Building new refrigerated storage which will increase butane storage capacity by a third and double Energy Transfer's propane storage capacity
 - Project will further increase ability to keep customers' ships loading on time
- Combined costs of both projects expected to be ~\$1.5B

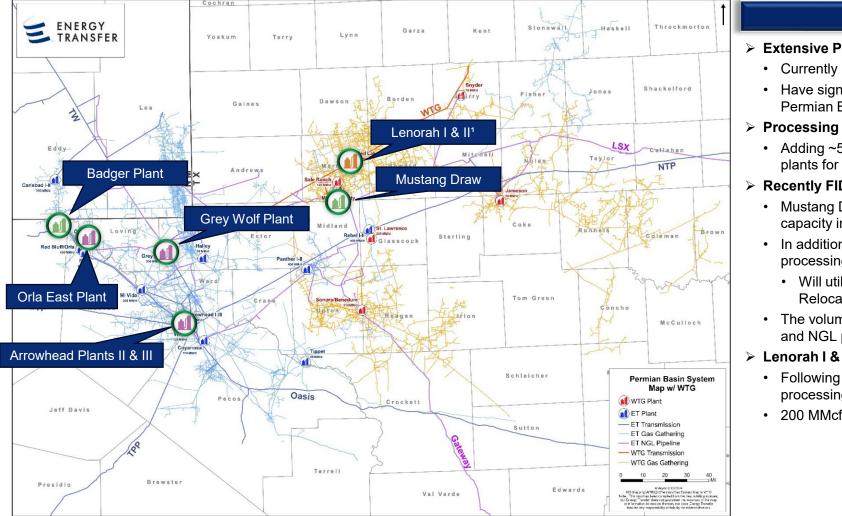

Energy Transfer's market share of worldwide NGL exports remains at ~20%

Sabina 2 Pipeline

- Mont Belvieu to Energy Transfer's Nederland Terminal
- Upon completion in mid-2026, will have the ability to flow at least 70,000 Bbls/d and provide much needed incremental transportation capacity to Nederland to meet the growing demand for natural gasoline products
- Initial phase went into service in Q4 2024 and increased the capacity from 25,000 Bbls/d to ~40,000 Bbls/d
- $\circ~$ Term transportation commitments in place

Permian Basin Processing Strengthening Position to Meet Growing Demand

Permian Basin Footprint

- > Extensive Permian Basin Footprint:
 - Currently have ~5.0 Bcf/d of processing capacity in the Permian Basin
 - · Have significant acreage dedications to ET processing plants in the Permian Basin
- Processing Plant Optimizations
 - Adding ~50 MMcf/d of capacity at four different Permian Basin processing plants for an incremental ~200 MMcf/d of processing capacity
- Recently FID'd New Mustang Draw Processing Plant
 - Mustang Draw will provide an incremental 275 MMcf/d of processing capacity in the Midland Basin, and is expected to be in service in Q2 2026
 - In addition, the Badger plant will provide an incremental 200 MMcf/d of processing capacity, and is expected to be in service in mid-2025
 - Will utilize an idle plant that is being relocated to the Delaware Basin -Relocating this idle plant will help save capital versus building a new plant
 - The volumes from the tailgate of these plants will utilize Energy Transfer gas and NGL pipelines for takeaway from the basin
- Lenorah I & II¹
 - Following the closing of the WTG acquisition, the 200 MMcf/d Lenorah I processing plant was placed into service
 - 200 MMcf/d Lenorah II processing plant expected to be in service Q2'25

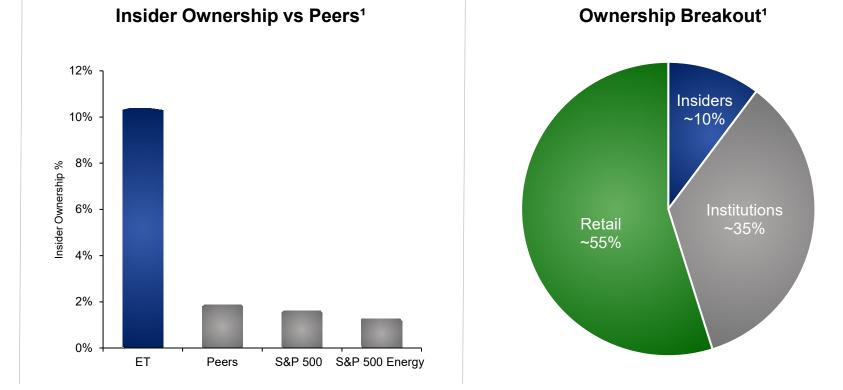

In the process of expanding processing capacity at several existing processing plants, as well as adding new processing capacity in West Texas

Significant Management Ownership

Leadership Support

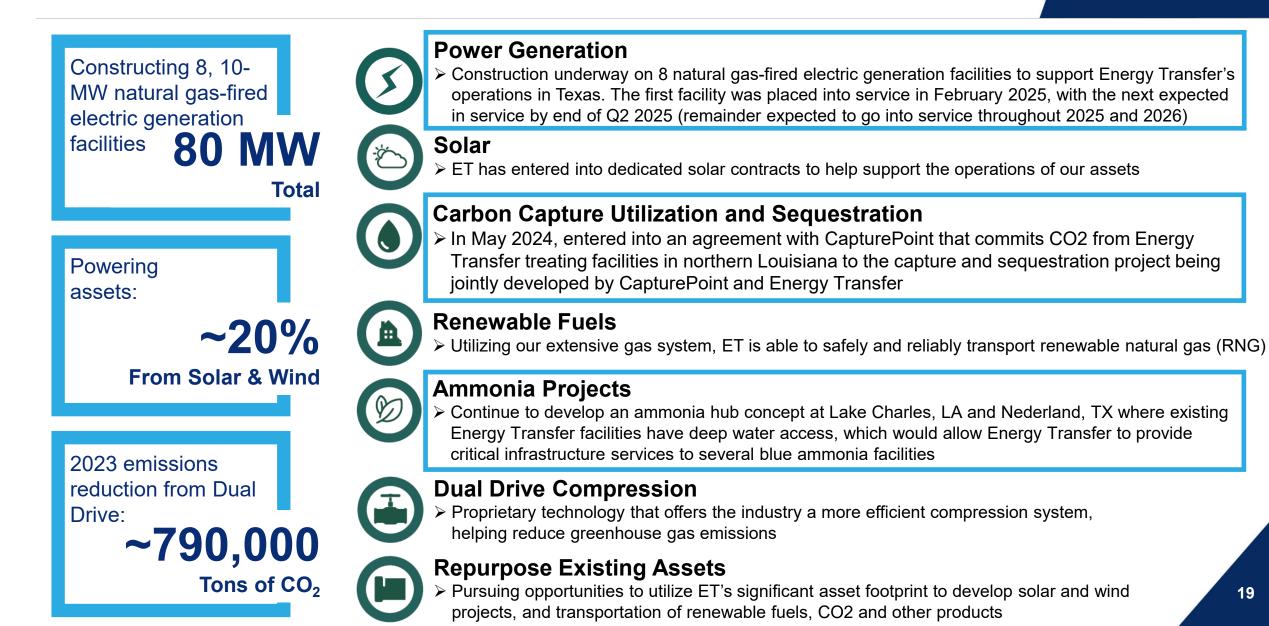

- Energy Transfer insiders and independent board members purchased more than 44 million units, totaling ~\$468 million, since January 2021
- Executive Chairman (Kelcy Warren) ET unit purchases since Jan. 2019:
 - ~61mm units or ~\$675mm
- Co-CEOs hold at least 6x annual base salary in ET units

Management and Insiders significantly aligned with unitholders

Leveraging asset base and expertise to develop projects to reduce environmental footprint

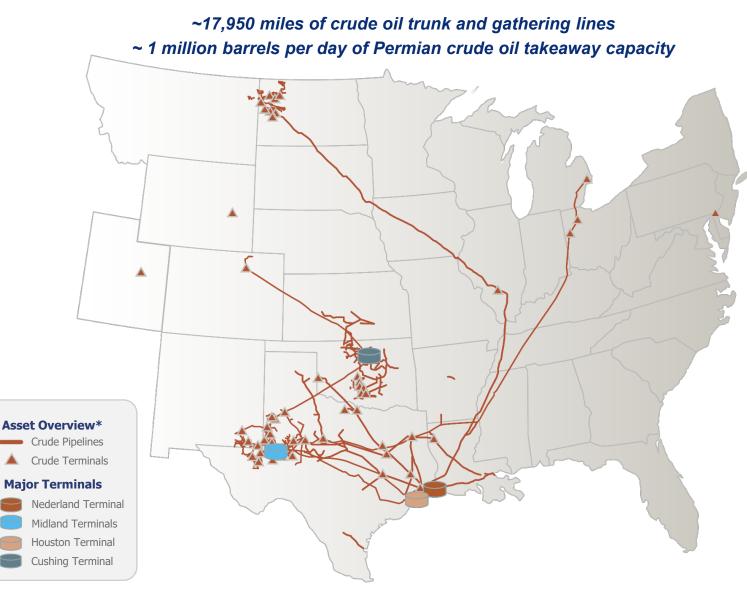

Appendix

, since

Crude Oil Segment

Crude Oil Pipelines

- Directly connected to 7.8 MMbbls/d (~44%) of domestic refining capacity
- > 1.85 MMbbls/d of ET-owned export capacity on USGC
- ET owns and operates substantial interests in the following systems/entities:
- Bakken Pipeline (36.4%)
- Bayou Bridge Pipeline (60%)
- White Cliffs (51%)Maurepas (51%)
- Permian Express Partners (87.7%) Permian JV (67.5%)
- ET-S Permian JV (67.5%)
- ET also owns a 5% interest in the Wink to Webster Pipeline

Crude Oil Acquisition & Marketing

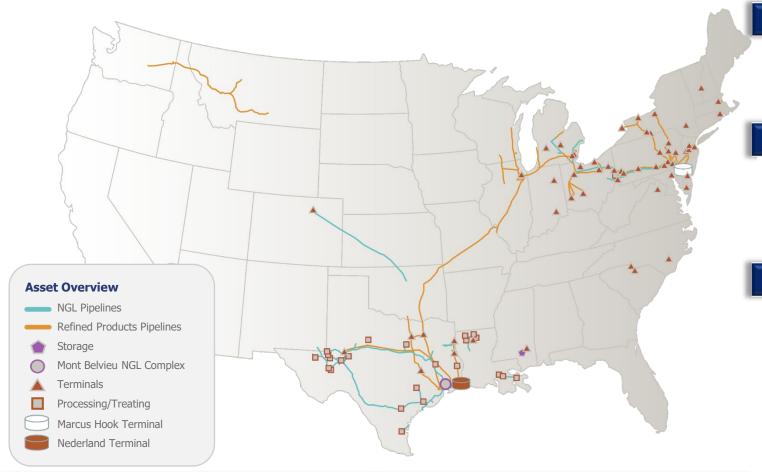

- Crude truck fleet of ~380 trucks, ~350 trailers, and ~240 offload facilities, as well as 3rd party truck, rail, pipeline and marine assets
- Purchase crude oil at the lease from 3,000+ producers, and in-bulk from aggregators at major pipeline interconnections and trading points
- > Market crude oil to refining companies and other traders across asset base
- > Optimize assets to capture time and location spreads

Crude Oil Terminals

- Nederland, TX ~30 million barrel capacity
- Houston, TX ~18 million barrel capacity
- ET-S Permian JV ~11 million barrel capacity
- Cushing, OK ~10 million barrel capacity
- Patoka, IL ~2 million barrel capacity
- Marcus Hook ~1 million barrel capacity
- Colt Hub ~1 million barrel capacity

Natural Gas Liquids (NGLs) & Refined Products Segment

Fractionation

- > 8 Mont Belvieu fractionators (over 1.15 MMBbls/d)
- > 165,000 Bbls/d Frac IX expected to go into service in Q4'26
- > 35,000 Bbls/d Geismar Frac (Louisiana)

NGL Storage

- Total NGL storage ~97 million barrels
- > ~62 million barrels of NGL storage at Mont Belvieu
- > ~10 million barrels of NGL storage at Marcus Hook & Nederland Terminals
- > ~8 million barrels of NGL storage at Spindletop
- > ~5 million barrels of Butane storage at Hattiesburg

NGL Pipeline Transportation

- > ~5,700 miles of NGL pipelines throughout Texas, Midwest, and Northeast
- > ~1 MMBbls/d of Permian NGL takeaway to Mont Belvieu
 - Lone Star Express ~900-mile NGL pipeline with ~870 Mbpd capacity (currently expanding system to add an incremental 90,000 Bbls/d)
 - West Texas Gateway ~510-mile NGL pipeline with ~240,000 Bbls/d capacity (debottlenecking project underway)
- Mont Belvieu to Nederland Pipeline System
 - 71-mile propane pipeline with 300,000 Bbls/d capacity
 - 71-mile butane pipeline with 200,000 Bbls/d capacity
 - 62-mile ethane pipeline with 200,000 Bbls/d capacity
 - 62-mile natural gasoline pipeline with 30,000 Bbls/d capacity
- Mariner Pipeline Franchise
 - The Mariner East Pipeline System can move ~360,000 Bbls/d of NGLs (including ethane) to Marcus Hook
 - Mariner West Pipeline with ~50,000 Bbls/d capacity

NGL Exports

- ~700,000 Bbls/d of combined LPG, ethane and natural gasoline export capacity from Nederland Terminal
- ~400,000 Bbls/d of combined LPG and ethane export capacity from Marcus Hook Terminal

Refined Products

- ~3,760 miles of refined products pipelines in the northeast, midwest and southwest US markets
- ~35 refined products marketing terminals with ~8 million barrels storage capacity

World-Class Export Capabilities – Uniquely Positioned to Serve Global Demand

Houston Terminal

- 330 acres on Houston Ship Channel
- 18.2 million Bbls of crude and heated product storage
- ~850,000 Bbls/d of crude export capacity
- 5 ship docks, 7 barge docks
- Rail and truck unloading
- Connectivity to Gulf Coast refining complex
- Pipeline connectivity to all major basins
- Deepwater marine access

Total Export Capacity

Crude Oil: ~1.9 million Bbls/d NGL: 1.1+ million Bbls/d

Marcus Hook Terminal

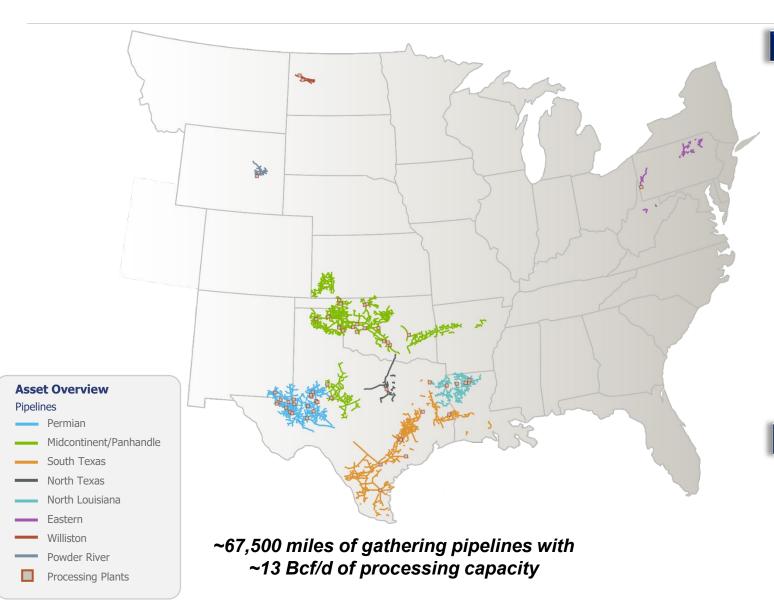

- ~800 acre site: inbound and outbound pipeline along with truck, rail and marine capabilities
- ~2 million Bbls underground NGL storage
- ~4 million standard Bbls of refrigerated NGL storage capacity
- ~1 million Bbls crude storage capacity
- ~1 million Bbls refined products storage capacity
- · 4 export docks accommodate VLGC and VLEC sized vessels
- · Completed dredging to increase the depth to 42 ft
- ~400,000 Bbls/d of combined LPG and ethane export capacity
- Construction underway on 900,000 Bbls refrigerated ethane storage tank and approximately 20,000 Bbls/d of incremental ethane chilling capacity

Nederland Terminal

- ~2,000 acre site on U.S. Gulf Coast
- ~30 million Bbls crude storage capacity; 1.9 million standard Bbls of refrigerated propane/butane storage capacity
- 1.2 million standard Bbls of refrigerated ethane storage capacity
- ~700,000 Bbls/d of combined LPG, ethane and natural gasoline export capacity
- ~1 million Bbls/d of crude export capacity
- 6 ship docks (3 NGL, 3 crude capable) and 4 barge docks accommodate Suez Max sized ships
- Rail and truck unloading capabilities
- Space available for further dock and tank expansion and well positioned for future growth opportunities
- Construction is nearing completion on an expansion which is expected to add up to 250,000 Bbls/d of NGL export capacity (expected in service: ethane – May, propane – July and ethylene – Q4 2025)
- Constructing new refrigerated storage to increase butane and propane storage
 capacity

Midstream Segment

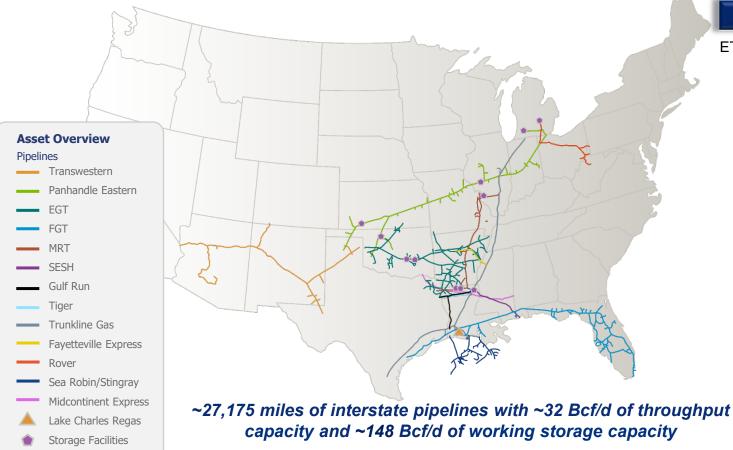

Midstream Highlights

- > Extensive Gathering and Processing Footprint
 - · Assets in most of the major U.S. producing basins
- 2024 Processing Capacity Additions
 - Completed 200 MMcf/d Lenorah I¹ processing plant
 - Completed upgrades at Jackson Plant in south Texas that added ~60 MMcf/d of processing capacity
 - Completed optimizations at Grey Wolf and Orla East, which added an incremental 100 MMcf/d of processing capacity (50 MMcf/d per plant)
- Processing Capacity Additions Underway
 - Adding an incremental 100 MMcf/d of processing capacity at Arrowhead II and III (50 MMcf/d per plant) in partial service
 - Relocation of 200 MMcf/d processing plant to the Delaware Basin (Badger) is expected in service mid-2025
 - 200 MMcf/d Lenorah II¹ processing plant is expected in service in Q2'25
 - 275 MMcf/d Mustang Draw processing place expected in service in 2Q'26

Current ET Processing Capacity									
	<u>Bcf/d</u>	Basins Served							
Permian	5.0	Midland, Delaware							
Midcontinent/Panhandle	2.9	Granite Wash, Cleveland, SCOOP, STACK							
North Texas	0.7	Barnett, Woodford							
South Texas	2.5	Eagle Ford. Eagle Bine							
North Louisiana	0.9	Haynesville, Cotton Valley							
Williston	0.4	Bakken							
Powder River	0.3	Powder River Basin							
Eastern	0.2	Marcellus Utica 24							

Interstate Natural Gas Pipeline Segment

Interstate Highlights

ET's interstate pipelines provide:

- > Stability
 - Approximately 95% of revenue derived from fixed reservation fees
- Diversity
 - · Access to multiple shale plays, storage facilities and markets
- Growth Opportunities
 - Well-positioned to capitalize on changing supply and demand dynamics
- Gulf Run Pipeline provides natural gas transportation between the Haynesville Shale and Gulf Coast
 - Zone 1 (formerly Line CP): ~200-mile FERC-regulated interstate pipeline with a capacity of ~1.4 Bcf/d¹
 - Zone 2 (new build): 135-mile, 42-inch interstate natural gas pipeline with 1.65 Bcf/d of capacity (placed into service in December 2022)
- Trunkline Pipeline
 - Completed backhaul project at end of 2023, which added an incremental 400,000 Mcf/d of southward flow capacity on the system at very efficient capital costs

	PEPL	TGC	тw	FGT	SR	FEP	Tiger	MEP	Rover	Stingray	EGT	MRT	SESH	Gulf Run ¹	Total

1. Excludes ~0.4 Bcf/d of capacity leased by EGT' on Zone 1

Intrastate Natural Gas Pipeline Segment

~ 12,200 miles of intrastate pipelines with ~24 Bcf/d of throughput capacity, and ~88 Bcf/d of working storage capacity

Intrastate Highlights

- > Well-positioned to capture additional revenues from anticipated changes in natural gas supply and demand, including increases in natural gas power demand
- Strategically taken steps to lock in additional volumes under fee-based, long-term contracts with third-party customers
- Completed modernization and debottlenecking work on the Oasis Pipeline, which added more than 60,000 Mcf/d of capacity out of the Permian Basin in Q1 2023
- Constructing Hugh Brinson Pipeline Project to provide natural gas takeaway from the Permian Basin to Energy Transfer's extensive pipeline network south of the DFW Metroplex
 - Expected to provide producers with firm capacity to premier markets and trading hubs

Pipeline	Capacity (Bcf/d)	Pipeline (Miles)	Storage (Bcf)	Bi- Directional	Major Connect Hubs

Non-GAAP Reconciliation

Definitions

Adjusted EBITDA and Distributable Cash Flow are non-GAAP financial measures used by industry analysts, investors, lenders and rating agencies to assess the financial performance and the operating results of Energy Transfer's fundamental business activities and should not be considered in isolation or as a substitute for net income, income from operations, cash flows from operating activities or other GAAP measures. There are material limitations to using measures such as Adjusted EBITDA and Distributable Cash Flow, including the difficulty associated with using either as the sole measure to compare the results of one company to another, and the inability to analyze certain significant items that directly affect a company's net income or loss or cash flows. In addition, our calculations of Adjusted EBITDA and Distributable Cash Flow may not be consistent with similarly titled measures of other companies and should be viewed in conjunction with measures that are computed in accordance with GAAP, such as operating income, net income and cash flows from operating activities.

We define Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Inventory valuation adjustments that are excluded from the calculation of Adjusted EBITDA represent only the changes in lower of cost or market reserves on inventory that is carried at last-in, first-out ("LIFO"). These amounts are unrealized valuation adjustments applied to Sunoco LP's fuel volumes remaining in inventory at the end of the period.

Adjusted EBITDA reflects amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates. The use of Adjusted EBITDA or Adjusted EBITDA related to unconsolidated affiliates as an analytical tool should be limited accordingly.

Adjusted EBITDA is used by management to determine our operating performance and, along with other financial and volumetric data, as internal measures for setting annual operating budgets, assessing financial performance of our numerous business locations, as a measure for evaluating targeted businesses for acquisition and as a measurement component of incentive compensation.

We define Distributable Cash Flow as net income, adjusted for certain non-cash items, less distributions to preferred unitholders and maintenance capital expenditures. Non-cash items include depreciation, depletion and amortization, non-cash compensation expense, amortization included in interest expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and deferred income taxes. For unconsolidated affiliates, Distributable Cash Flow reflects the Partnership's proportionate share of the investees' distributable cash flow.

Distributable Cash Flow is used by management to evaluate our overall performance. Our partnership agreement requires us to distribute all available cash, and Distributable Cash Flow is calculated to evaluate our ability to fund distributions through cash generated by our operations.

On a consolidated basis, Distributable Cash Flow includes 100% of the Distributable Cash Flow of Energy Transfer's consolidated subsidiaries. However, to the extent that noncontrolling interests exist among our subsidiaries, the Distributable Cash Flow generated by our subsidiaries may not be available to be distributed to our partners. In order to reflect the cash flows available for distributions to our partners, we have reported Distributable Cash Flow attributable to partners, which is calculated by adjusting Distributable Cash Flow (consolidated), as follows:

• For subsidiaries with publicly traded equity interests, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiary, and Distributable Cash Flow attributable to our partners includes distributions to be received by the parent company with respect to the periods presented.

• For consolidated joint ventures or similar entities, where the noncontrolling interest is not publicly traded, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiaries, but Distributable Cash Flow attributable to partners reflects only the amount of Distributable Cash Flow of such subsidiaries that is attributable to our ownership interest.

For Distributable Cash Flow attributable to partners, as adjusted, certain transaction-related adjustments and non-recurring expenses that are included in net income are excluded.

For the calculation of Distributable Cash Flow, the amounts reflected for (i) Adjusted EBITDA related to unconsolidated affiliates, (ii) Distributable Cash Flow from unconsolidated affiliates, and (iii) Distributable Cash Flow attributable to Sunoco LP exclude Sunoco LP's Adjusted EBITDA and distributable cash flow related to its investment in joint ventures with Energy Transfer, as such amounts are eliminated in the Energy Transfer consolidation.
